

Web Executive

You will be amazed at the simplicity with which Web Executive can be used to design and create Web pages for any Web-based TRAMPS property solution.

Web Executive provides remote users with the ability to gain fast and effective access to any property management data you wish to share, both within your company and with clients, investors, partners or shareholders outside. Web Executive provides the means by which user-defined Web enquiries can be made on your property portfolio with just an Internet connection and a Web browser. It is easy to learn and easy to use.

Key benefits

- ◆ Internet access to your property data from anywhere in the world
- ◆ Specifically-designed business intelligence that's always up to date and in the format you need it
- ◆ Flexible drill down for reviewing portfolio details "top down"
- ◆ Web Executive can integrate seamlessly with your corporate intranet or e-commerce solution to provide an instant update of your Key Performance Indicators
